EDUCATION

University of Michigan – Ann Arbor
B.S.E. in Computer Science, Minor in User Experience Design

Ann Arbor, MI
Expected Dec 2027

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, Swift, C/C++, C#, SQL (PostgreSQL), HTML/CSS

Frameworks: React Native (Expo), React, Next.js, Node.js, Vue.js, Django, Flask, PyTorch, Tailwind CSS

Tools & Platforms: Git, PostgreSQL, Firebase, Supabase, REST APIs, Jira, Figma, Three.js, Jest

EXPERIENCE

SPAN

Mobile Engineering Intern

Jun 2026 – Sep 2026
San Francisco, CA

- Shipped production **React Native** features to SPAN's homeowner energy app, fixing **50+** QA-flagged rendering and state-sync defects across **iOS and Android**
- Engineered an in-app **Jira bug-reporting tool** that auto-captured diagnostic context, cutting ticket-creation time and an estimated **\$20K/year** in engineering and tooling costs
- Fixed cross-package iOS/Android build failures in a multi-app React Native **monorepo**, tracing dependency, native-module, and generated-project conflicts to restore reliable dev builds

Nalara Corporation

Web Engineering Intern

Jun 2025 – Aug 2025
Livonia, MI

- Shipped a **100+ page full-stack Vue.js platform** for logistics tracking and workforce management, adopted across internal departments
- Built **real-time analytics dashboards** with live inventory tracking and advanced filtering, improving operational visibility
- Automated HR workflows with **Django ORM and PostgreSQL** for candidate tracking and interview scheduling, cutting processing time **35%**

PROJECTS

Marshmallow

Founder & Product Engineer

Jan 2026 – Jun 2026
React Native, Swift, Supabase, PostgreSQL

- Built a screen-time app that turns phone-free focus sessions into a growing virtual companion, authoring a custom **Swift** bridge over Apple's **FamilyControls**, **ManagedSettings**, and **DeviceActivity** APIs to enforce real app blocking from React Native
- Shipped **five native app extensions** — interactive block shield, scheduled-block monitor, home-screen widget, and **Live Activity** — via custom **Expo config plugins** and App Group shared state
- Designed a session-growth model with diminishing returns, streak and quality multipliers, and a daily soft cap, verified by a **262-test** Jest suite

Quadly

Mobile & Product Engineer

Jan 2026 – Jun 2026
React Native, Firebase, PostgreSQL

- Launched a cross-platform social app serving **100+ users** with authentication, real-time messaging, and marketplace features
- Architected a **multi-tenant PostgreSQL schema** with migrations and Row Level Security to isolate university data

Spectacle Face Recognizer

AI & Product Engineer

Nov 2025 – Jan 2026
Lens Studio, React, PostgreSQL

- Published an **AI facial-recognition system** for Snapchat Spectacles with a PostgreSQL **facial-embedding pipeline** for vector similarity search and profile retrieval
- Achieved **95.2% recognition accuracy** on a labeled test set by tuning similarity thresholds and adding unknown-face onboarding

LEADERSHIP

Augmented Reality Initiative (ARI)

Hackathon & Website Lead

Mar 2026 – Present
Ann Arbor, MI

- Organize the XR track for hackathons including MHacks; maintain the ARI website with **Three.js** and Unity WebGL builds

Imagine Software Club

UI/UX Lead

Sep 2024 – Dec 2024
Ann Arbor, MI

- Won **1st Place, Best UI/UX** at the MSU Imagine Software Fall 2024 Showcase with SideQuest, a gamified travel app (100+ Figma screens)
